SECTION 965
GENERAL PROVISIONS FOR ALUMINUM ITEMS
(INCLUDING WELDING)

965-1 Surface Appearance and Protection.
The exterior surfaces of aluminum castings, pipes, tubes, formed sheets, and structural
shapes shall, when placed in the work, have a clean, uniform silvery appearance, free of dark
streaks and discoloration.

Aluminum members (including specifically aluminum light poles and signs poles) which
are of such size or shape that the surfaces might be marred during transit and prior to their being
installed, shall be appropriately and adequately protected against such damage, by wrapping with
paper or by other effective means.

965-2 Certification and Mill Analysis.
For aluminum materials used for pipe, tube, sheet and other structural shapes for
structures other than drainage, the fabricator must maintain a certified mill analysis of the alloys
for three years following fabrication.

965-3 Welding Aluminum Sign Structures.
Welding and weld details shall be in accordance with Section 14 of the AASHTO LRFD
Specifications for Structural Supports for Highway Signs, Luminaires and Traffic Signals; ANSI
and AWS D1.2 “Structural Welding Code - Aluminum”, including the requirements for
qualifications of procedures and welders, as specified therein.

1. Alloys: The aluminum alloys to welded under these specifications may be any
of the following alloys:

Wrought Nonheat-treatable Alloys:
- Alloy 3003
- Alloy Alclad 3004
- Alloy 5052
- Alloy 5083
- Alloy 5086
- Alloy 5456

Wrought Heat-treatable Alloys:
- Alloy 6061
- Alloy 6063
- Cast Heat-treated Alloy
- Alloy SG-70A (ASTM Designation)

2. Filler Metals: The filler metals to be used with particular base metals shall be as
shown in the table below except that other filler metals may be used if approved by the Engineer.

<table>
<thead>
<tr>
<th>Base Metal</th>
<th>Filler Metal</th>

<tr>
<td>SG-70A to 6061</td>
<td>ER4043</td>
</tr>
</tbody>
</table>

*ER5183, ER5356, and ER5556 may be used interchangeably for these base metals.

965-4 Welding Aluminum Structures Other Than Sign Structures.

The welding of aluminum structures, other than sign structures, such as aluminum bridge and railing structures and their aluminum components, shall be in accordance with ANSI and AWS D1.2 “Structures Welding Code-Aluminum”, including the requirements for qualifications of procedures and welders, as specified therein.
