END VIEW AT END DIAPHRAGM

SECTION C-C

NOTES:
1. Drains shall be placed adjacent to each web at each beam end (four drains per beam). Drains shall be 2" Nominal Pipe Size Schedule 80 PVC. Provide removable pipe plugs to prevent concrete entrance during beam casting. Plugs to be removed from the inside after casting. Galvanized screen wire shall cover the end of the pipe and bent down around the sides of the pipe, a minimum of 1" and secured prior to casting.
2. Concrete face may be sloped with a maximum 1:24 slope to facilitate formwork removal.
