TOP SLABS

GENERAL NOTES

1. This inlet is primarily intended for locations with light to moderate flows where right of way does not permit the use of through curb inlets. Where the typical application is on curb returns to city streets. The grate is suitable for pedestrian and bicycle traffic.

2. This inlet to be located outside of curb ramp area in vertical faced curbs such as Curb and Gutter Type C. Grate shall be oriented with vanes directed toward predominant flow.

3. For structure bottoms see Index No. 200. For supplemental details see Index No. 201.

4. All steel in a top shall also have 3/4" minimum cover unless otherwise shown. Toppings shall be either cast-in-place or precast concrete.

5. For Alternate B applications top slab openings shall be placed such that 2 edges of inlet frame will be located directly above bottom waler or riser wall.

6. When used on a structure with dimensions larger than those detailed above and risers are not applied, the top slab shall be constructed using Index No. 200 with the slab opening adjusted to 24" x 16". The "Special Top Slab" on Index No. 200 is not permitted.

7. Frame may be adjusted to one to six courses of brick.

8. Cast iron frame grate and hood to be U.S. Foundry 5130-6018, Neenah Foundry R-3067-A, or approved equal. Inlet and grate detail shown is Neenah Foundry R-3067-A. Vandal resistant with approximately equal openings will be permitted that satisfy ASHTO HS-20 loading. Grates shall be reversible, right or left.
